# INTRODUCTION

A hotel management project in computer science typically involves creating software to streamline various aspects of hotel operations, such as reservation management, room allocation, guest services, billing, and inventory management.

The project often includes designing user-friendly interfaces for both hotel staff and guests, integrating databases for storing information, and implementing features like online booking and payment processing.

It aims to automate processes, improve efficiency, and enhance the overall guest experience in hospitality establishments.

# PROJECT SCOPE

- Reservation Management
- Room Allocation
- Guest Services
- Billing and Invoicing
- Inventory Management
- Employee Management
- Reporting and Analytics
- Security and Access Control

# Hardware , Software and Language

## Hardware

- Processor 1.60 GHz
- RAM 1024 GB
- Hard Disk 60 GB

## Software

- Eclipse
- MySQL Workbench

## Language

- Operating System: Windows/Linux
- Database: MySQL
- Programming Language: JAVA

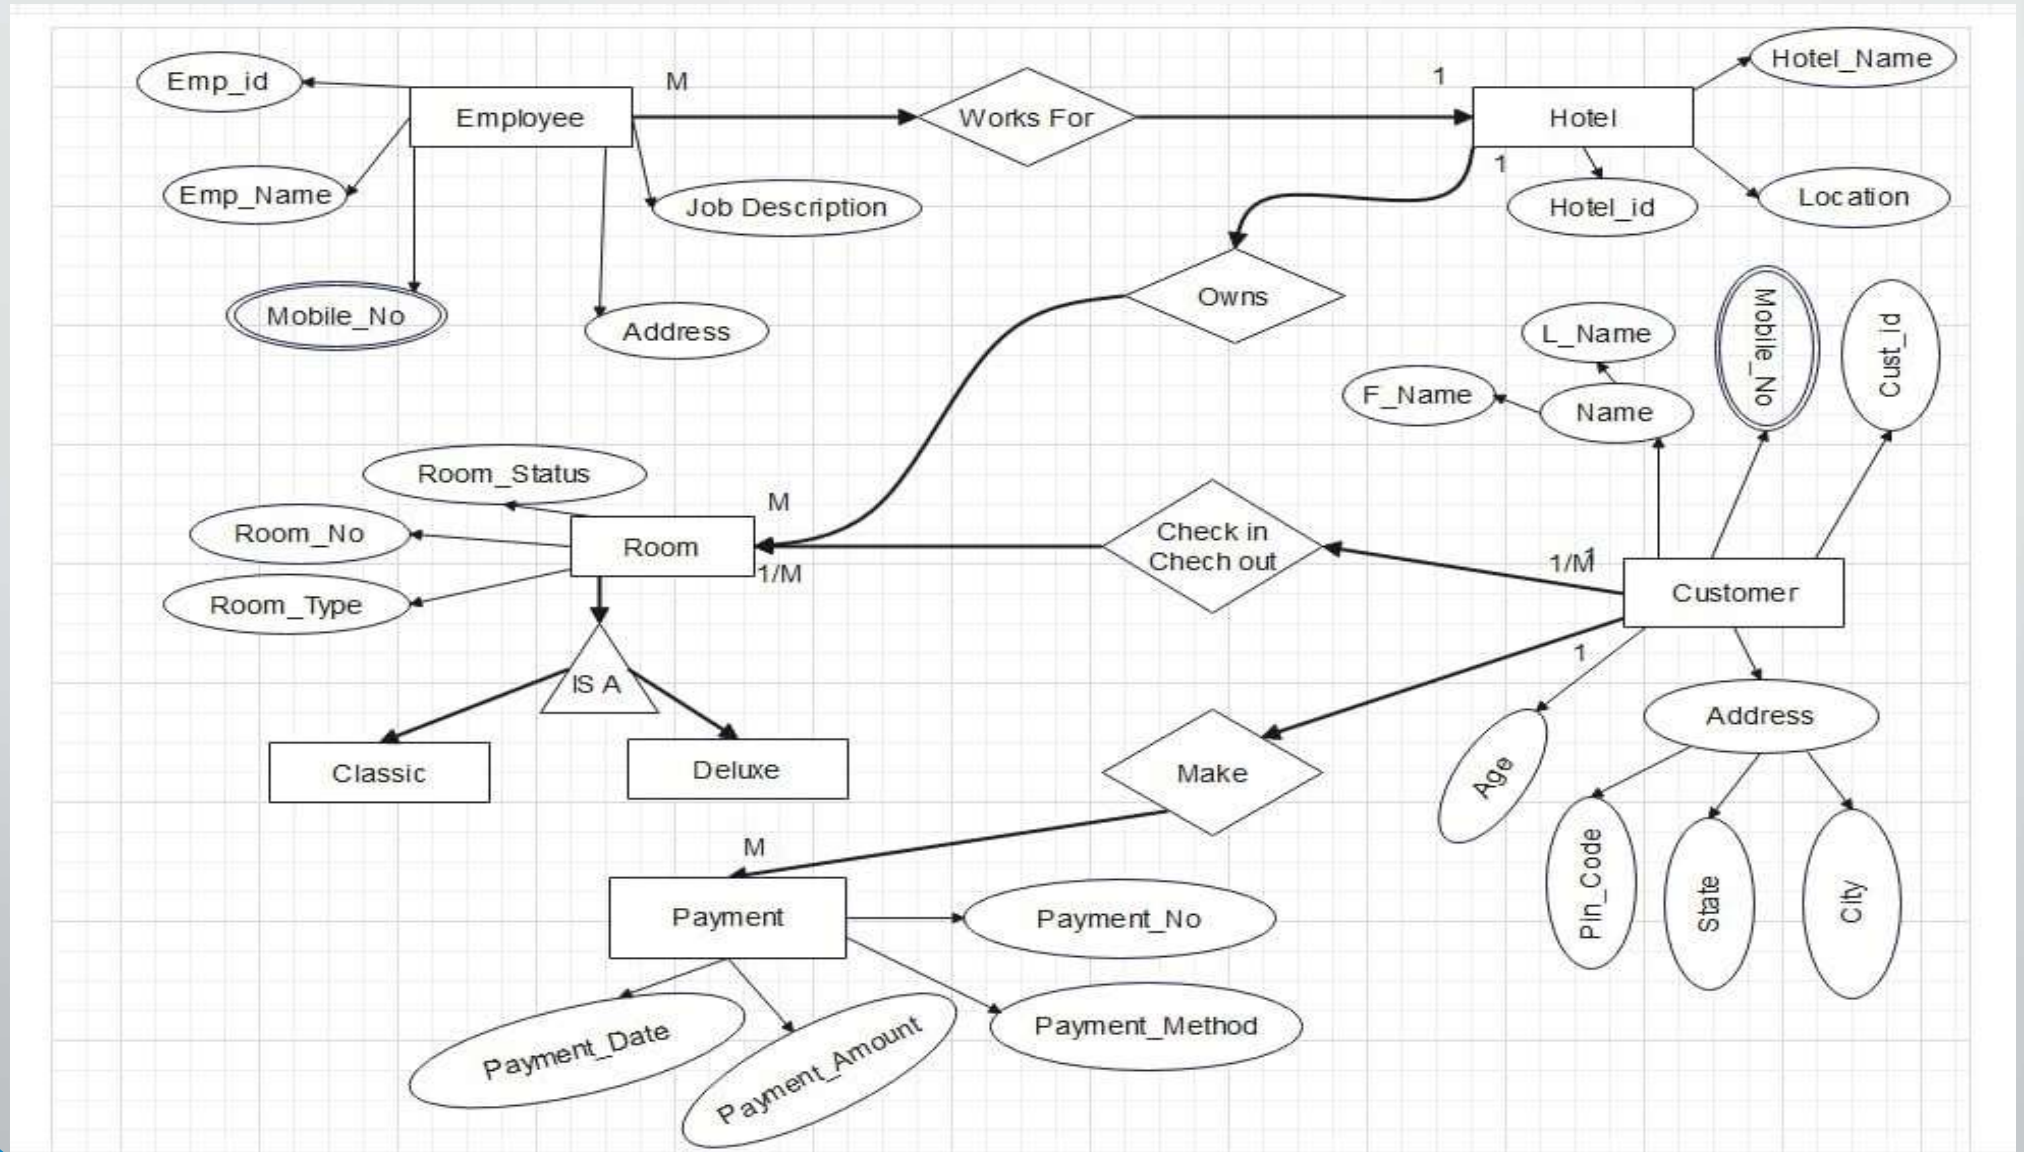

# Benefits of Hotel Management

- Streamlined Operations
- Enhanced Customer Experience
- Revenue Optimization
- Staff Efficiency
- Financial Management
- Improved Security

# Limitations of Hotel Management

- Scalability
- Performance
- Complexity
- Maintenance
- Security Concerns

# ER Diagram

# Future Scope

People can book the room from any location.

Project provide regular basis salary.

Online room management.

Easy room booking for everyone.

Simple and easy Billings.

# Conclusion

In summary, a hotel management project is an essential tool for streamlining hotel operations. By harnessing computer science, it optimizes tasks like reservations, guest services, and billing, ultimately enhancing the overall guest experience. As technology continues to advance, these projects will play a crucial role in ensuring efficiency and innovation within the hospitality industry.

Overall, a hotel management project in computer science is essential for hotels to stay competitive, improve efficiency, and meet the evolving expectations of guests in the digital age
